

## O2T/F multisensor fire detector IQ8Quad with isolator

**Part-No.: 802383**

**Approval: VdS**

In addition to smoke detection with the conventional O<sup>2</sup>T multisensor technology, the detector is provided with a built-in flash lamp.

### Detection

Multisensor detectors with two built-in optical smoke sensors with different scattered light angles as well as additional heat detector sensor evaluation for detecting everything from smouldering fires to open fires with consistent response performance. Smoke sensor signal identification to ensure smoke classification and reduction of false alarms caused, for instance, by water vapour or dust. Each detector is provided with an integrated isolator.

### Alarm signalling

The alarm signalling device is activated by the control panel. No further short address needs to be allocated. It is programmed with tools 8000 as of software version 1.05.

### Features:

- The reliable O<sup>2</sup>T multisensor principle for consistent response performance at the highest level of security against false alarms
- Individual control of the beacon
- Loop powered - no need for external power supply
- No additional short address
- Automatic synchronization of various IQ8Quad alarm signaling devices
- High flash energy
