Compliance

Product information

The XP95A Dual Action Addressable Manual Pull Station features a translucent plastic panel at the centre enabling visibility of an internal LED that indicates alarm condition and polling status.

The pull station may be flush mounted on a single gang work box or by using the optional backbox.

- · Control panel compatibility
- Key lock
- Easily reset
- LED visible even when the Pull Station is closed
- Lightweight polycarbonate housing

All data is supplied subject to change without notice. Specifications are typical at 24 V, 73°F and 50% RH unless otherwise stated.

Call point type Pull station

Alarm indicator Red light emitting diode (LED)

Fault indicator Amber/Yellow LEDs

Supply wiring Two-wire supply, polarity

sensitive

Loop connections Terminal block L1 -ve/L2 +ve

Digital communication XP95, (Discovery and CoreProtocol compatible)

Supply voltage 17 - 28 V dc
UL listed to operate 20 - 28 V dc

Operating temperature 32°F to 100°F (0°C to 38°C)

Humidity (no condensation 0% to 95% RH

or icing)

Standards and approvals UL38

Dimensions 5½ in. (140 mm) height x 4½ in.

(105 mm) wide x 11/8 in (29 mm)

depth

Weight 7 oz (199 g)

Materials Housing: Red self-coloured

polycarbonate/ABS

Operation

The address of each pull station is set at the commissioning stage by means of a seven-segment DIP-switch.

Pushing in, then pulling down on the handle causes it to latch in the down/activated position.

Once activated the yellow activated flag appears at the bottom of the pull station face. The pull station is reset by inserting the reset key into the top of the unit, this opens the door which in turn resets the handle; closing the door automatically resets the switch.
